WORK EXPERIENCE

Western Financial Group   **Jul. 2022 – Present**
Associate Software Engineer (.NET)   *Remote*

- Developed and enhanced SaaS web applications using C# and .NET 8, implementing Blazor components and cloud infrastructure solutions that improved system performance by 40%
- Built secure REST APIs with OAuth2/JWT authentication while working closely with cross-functional teams to deliver robust, scalable solutions following SOLID principles.
- Managed release implementations through Azure DevOps pipelines, streamlining deployment processes and cutting release cycles by 30% through automation
- Led technical initiatives as Senior Developer, facilitating code reviews and mentoring team members while ensuring all deliverables met project timelines and quality standards
- Solved complex technical challenges through systematic troubleshooting, delivering 30+ production releases with zero critical issues using comprehensive testing frameworks (NUnit, xUnit)
    - **Stack:** C#, .NET 8, Blazor, Azure DevOps, SQL Server, Entity Framework, REST API, OAuth2/JWT
    - **Key Results:** 30+ production releases with zero defects, 95% sprint completion rate, zero critical incidents.

Kidco Construction LTD   **Sep. 2021 – Jun. 2022**
Software Engineer   *Calgary, AB*

- Modernized legacy systems by migrating .NET 3.5 applications to .NET 8 with ASP.Net MVC architecture, boosting operational efficiency by 35%.
- Designed and optimized database solutions for high-availability Azure cloud environments, ensuring seamless performance under heavy workloads.
- Collaborated with stakeholders throughout the software development life cycle, delivering feature enhancements that consistently met business requirements and deadlines.
    - **Stack:** C#, .NET, ASP.Net MVC, Azure (Cloud), SQL Server, Entity Framework
    - **Key Results:** Consistently met sprint goals, driving a 95% sprint completion rate, improved team velocity

Think box   **Jul. 2019 – Sep. 2021**
UI/UX Designer Tester   *Winnipeg, MB*

- Developed user interfaces and executed automated test scripts, improving testing efficiency by 50%.
- Collaborated with development teams to implement responsive design patterns.
    - **Stack**: UI/UX, Automated Testing, AWS
    - **Key Result:** Enhanced automated test coverage, reducing UI-related support tickets by 30%.

EDUCATION

University of Manitoba   **Sep. 2015 – Sep. 2021**
Bachelor of Science, Computer Science   *Winnipeg, MB*

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications:** Microsoft Certified: Azure Developer Fundamentals
- **Technologies:** C#, .NET, Blazor, ASP.Net MVC, Azure, Java, Python, Node.js, Django, REST API, gRPC, microservices, SQL, DynamoDB, GCP
- **DevOps**: Azure DevOps, CI/CD pipelines, GitLab, Visual Studio, GitHub
- **Skills:** problem solving, root cause analysis, proven leadership skills, Application Development, Object-Oriented Design, Agile/Scrum, Code Reviews, Security Best Practices, Data Integrity, Scalable Web Applications.
- **Tools**: Visual Studio, Reporting server, SSMS, Google Workspace, GitHub, Copilot, Slack, Notion,
